

“Serious things cannot be understood without laughable things, nor opposites at all without opposites.”

discipline gleaned . . .

individually seen  
Connecting means; going to the extremes

then begin at that end . . .

Where you've been?

Take a moment to comprehend—

Start where you're at, in that body you're in

Where to begin?

### Extreme Discipline

*The continuum vibration of one!*

*fluently*

*mind flowing*

*A steady state of congruency*

### Focused Balance

Edison, Bell and Tesla stand at the head of the pantheon of greats. The inventor creates new uses from the raw materials, elements, and ideas that abound. A blueprint is given shape and takes form—a transformation of the concept, from the mind to the paper. Then the building of the creative process. The search is on—seeking, molding, growing. The needs are served; the goal is won.

### The Faculties of the Mind

People have differing unities of organization. Every case has an end, never an ultimate means. To interpret the end or conclusion of Immanuel Kant one arrives at a subconscious will of intuition. This is a knowingsness that pervades on inclination. The psychological transition to the laws of nature are a reality interface.

Kant broke down the workings of the mind into a doctrine of faculties. He spoke of reason, intuition, concepts, understanding, imagination and sensibility. These six faculties all together equal an individual's common sense. There is a difference in nature, amongst these faculties, individually and through the interaction with the other faculties. Everyone falls somewhere on their own unique scale.

The great thinkers, writers, storytellers, poets and play-makers all have the inner compelling urge to collect, create and organize thoughts and words. Thus bringing the intangible processes of the mind to concrete form. The name of the creator lives on with the power of words constructed and represented. Humanity's breadth of knowledge matures further—from this majority of one!

### Literati

### Words, words, words . . .

Some things can be quite absurd  
the words—meanings and combinations  
Covering the history of humankind  
and nature so Divine  
Literature, science, religion  
words—the basic tools given  
Words, words pave the roads  
for knowledge to make deeper inroads

### Create Pro-create

*The inward to the outward, known  
To see and be seen, what is within  
Create, pro-create—begin . . .  
From there within, you're in  
your mind then . . .  
So the stories go  
don't you know?  
Say - "It's so!" ya know!  
Create, pro-create, incarnate  
promised fate . . .  
Destiny secured for sure!*

### A brief word from the Author:

“Every moment we think — we choose, we create. Every choice is a creation. Choose to create your life the way you want it to be.”
