

—Einstein

Lifetime lived amongst the elements!

*evolutionary production
a paradox of natural selection &
an unending creation
The lifetime of the universe
situations integrate; circumstances relate
with an evolving growth,
Peopled horizons, learning lessons
as stars beyond . . .
an infinite sky
One earth; one moon
minds in a slow race.
just placed
the continuum place
in time and space
The Evolutionary Elements*

“Not everything that counts can be counted, and not everything
that can be counted counts.”

*but still you keep the focus.
and also not much—
to know such & such
The ultimate focus*

Truth Seeking

*this universal system
revolving in . . .
so much worth
SpaceShip Earth
solid heart . . .
everyday . . .
Giving birth*

SpaceShip Earth

Socrates, Plato and Aristotle, immortal pillars, shine for the
human race. Our gratitude should be eternal.
Knowledge were stabilized; a firm foundation.
Great polarized the evolution of mankind. Culture, Art and
The ancient Greeks from the time of Homer to Alexander the
Great policed the evolution of mankind. Culture, Art and
knowledge were stabilized; a firm foundation.

Discovering

Einstein's Time Equation

Time is eternal
the present remains
The past clanks with heavy chains
 the future days
 a dream away
But—just now—
 you can be
time is eternal—you see!

A brief word from the Author:

“The greatest discoveries you will ever find are contained within the experience of yourself. Open the closed doors and windows of your mind and let the bright and sunny fresh air of thought guide you toward all you are. Look at the possibilities of discovery . . .”
